

SP 424N LL

4.2 RM

- Medium-tall variety with tons of branching
- 3(a) gene for PRR
- Excellent SDS scores
- A rugged bean that can handle stress

Characteristics

Ratings scale: 1= excellent, 2= very good, 3= good, 4= fair, 5= poor

LibertyLink® Patent Statement

Seeds containing the LibertyLink® trait may be protected under one or more U.S. patents and may be planted only to produce one (1) commercial crop in a single season, and only after signing a Bayer Grower Technology Agreement. It is illegal to save seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.

SCN Resistance	R3,MR14
Pubescence	Light Tawny
Hilum	Black
Flower	White
Plant Type	Bushy
Plant Height	Medium-Tall
PRR Rating	1.0 (3a)
BSR Rating	Not Rated

NOTES

LEGAL: Respect the Rotation™ is an initiative to elevate the importance and grower adoption of herbicide diversity to prevent or manage weed resistance. Glyphosate weed resistance is a dominating threat throughout the United States that affects land values, rental agreements, conservation tillage and can greatly reduce yields. The use of Integrated Weed

Management practices, such as use of residuals, pre-emergence herbicides and rotation of crops, traits and herbicides, is critical as no one method is likely to be completely successful.
